#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention:

*Group A* comprising:

*A1* a line object generation apparatus disposed above eye level;

*A2* a line object generation apparatus disposed below eye level;

*Group B* comprising:

*B1* a linear spatial light modulator comprising an array of GEMS elements;

*B2* a linear spatial light modulator comprising a GLV device;

*B3* a linear spatial light modulator comprising a micromirror linear array;

*Group C* comprising:

*C1* blocking zeroeth order light;

*C2* blocking non-zeroeth order light;

*Group D* comprising:

*D1* illumination beam at a vertically oblique angle;

*D2* illumination beam at a compound oblique angle;

Art Unit: 2851

*Group E* comprising:

*E1* a line image scanner comprising a folding mirror;

*E2* a line image scanner comprising a galvanometer;

*E3* a line image scanner comprising a rotating polygon;

*E4* a line image scanner comprising a rotating bigon;

*E5* a line image scanner employing a reciprocating motion;

*Group F* comprising:

*F1* a cylindrical display surface;

*F2* a spherical display surface;

The applicant is required to pick an element from each group. The applicant is advised that any embodiment as elected (combination selected) must have support in the specification. So while each of the individual elements may be disclosed, a particular combination must also be supported by the specification.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 appears generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is

Art Unit: 2851

allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
